AVOCADO INFORMATION

Variety	Type	Harvest	Hardy to	Size	Remarks
Bacon	B	October - January	Very Hardy 24°F	Medium	Popular variety in most areas, especially in areas of low winter temperatures where other varieties will not survive. Good tasting fruit, 8-12 oz., ovoid to pyri-form with medium-thin skin. Upright tree.
Little Cado (TM# 50552)	A or B	May - September	Tender 32°F	Very small (8-12 ft.)	a.k.a. Hybrid Dwarf. Suitable as a dwarf backyard tree, patio planter or espalier. Good tasting fruit, 8-14 oz., green skin, pyri-form shaped fruit with medium-thin skin.
Fuerte	B	November - June	Hardy 28°F	Large	Second largest commercially produced variety. Excellent fruit quality, alternate bearer. Fruit is 8-14 oz., pyri-form with medium-thin, green skin. Spreading tree.
Hass	A	February - October	Hardy 30°F	Medium - Large	Largest commercially produced variety. Excellent quality fruit is 7-12 oz., with medium, bumpy, green skin, turning black when ripe. Excellent choice for orchard and backyard.
Holiday	A	August - January	Hardy 30°F	Very small (10-12 ft.)	Exciting new variety developed by the UC Riverside breeding program. The tree bears large 15-30 oz. fruit with excellent flavor. Fruit is pear shaped and holds on the tree very well, which is a favorable characteristic for a prolonged harvest period. The tree is a heavy producer and is great for small backyards.
Mexicola Grande	A	August - October	Hardest 18°F	Large	The most frost-resistant of all varieties. High quality fruit is 6-12 oz. with thin, shiny, black skin. Fruit ripens before early frost.
Mexicola (Medium)	A	August - October	Hardest 18°F	Medium	Excellent quality small fruit. Attractive, productive tree with very good tasting, 4-8 oz. fruit with shiny black skin. Heavy producer.
Mexicola Stuart'	A	Sept. - November	Hardest 18°F	Small	A compact Mexicola-type avocado. Very good tasting, 4-8 oz. fruit has thin, black skin. Handsome tree has an attractive upright growth habit.
Pinkerton	A	October - January	Hardy 28°F	Small	Heavy producer near coast and inland areas. Excellent flavored fruit is 8-14 oz., pyri-form, with medium, pebbly, green skin. Medium spread. Excellent for backyard use.
Reed	A	June - November	Tender 30°F	Medium	A great choice for backyard use. Excellent flavored fruit is 12-18 oz., round, with medium green skin. Heavy producer. Upright tree.
