## TROPICAL FRUIT INFORMATION

### AVOCADO

Variety	Type	Harvest	Hardy to	Size	Remarks
<b>Bacon</b>	B	October - January	Very Hardy 24°F	Medium	Popular variety in most areas, especially in areas of low winter temperatures where other varieties will not survive. Good tasting fruit, 8-12 oz., ovoid to pyri-form with medium-thin skin. Upright tree.
<b>Little Cado (TM# 50552)</b>	A or B	May - September	Tender 32°F	Very small (8-12 ft.)	a.k.a. Hybrid Dwarf. Suitable as a dwarf backyard tree, patio planter or espalier. Good tasting fruit, 8-14 oz., green skin, pyri-form shaped fruit with medium-thin skin.
<b>Fuerte</b>	B	November - June	Hardy 28°F	Large	Second largest commercially produced variety. Excellent fruit quality, alternate bearer. Fruit is 8-14 oz., pyri-form with medium-thin, green skin. Spreading tree.
<b>Hass</b>	A	February - October	Hardy 30°F	Medium - Large	Largest commercially produced variety. Excellent quality fruit is 7-12 oz., with medium, bumpy, green skin, turning black when ripe. Excellent choice for orchard and backyard.
<b>Holiday</b>	A	August - January	Hardy 30°F	Very small (10-12 ft.)	Exciting new variety developed by the UC Riverside breeding program. The tree bears large 15-30 oz. fruit with excellent flavor. Fruit is pear shaped and holds on the tree very well, which is a favorable characteristic for a prolonged harvest period. The tree is a heavy producer and is great for small backyards.
<b>Mexicola Grande</b>	A	August - October	Hardest 18°F	Large	The most frost-resistant of all varieties. High quality fruit is 6-12 oz. with thin, shiny, black skin. Fruit ripens before early frost.
<b>Mexicola (Medium)</b>	A	August - October	Hardest 18°F	Medium	Excellent quality small fruit. Attractive, productive tree with very good tasting, 4-8 oz. fruit with shiny black skin. Heavy producer.
<b>Mexicola Stuart'</b>	A	Sept. - November	Hardest 18°F	Small	A compact Mexicola-type avocado. Very good tasting, 4-8 oz. fruit has thin, black skin. Handsome tree has an attractive upright growth habit.
<b>Pinkerton</b>	A	October - January	Hardy 28°F	Small	Heavy producer near coast and inland areas. Excellent flavored fruit is 8-14 oz., pyri-form, with medium, pebbly, green skin. Medium spread. Excellent for backyard use.
<b>Reed</b>	A	June - November	Tender 30°F	Medium	A great choice for backyard use. Excellent flavored fruit is 12-18 oz., round, with medium green skin. Heavy producer. Upright tree.
<b>Zuntano</b>	B	December - January	Very Hardy 26°F	Large	The best pollinator for Hass. Performs well in both coastal and inland climates. Good tasting, 10 oz., pyri-form fruit has medium-thin, green skin. Heavy bearer.

## CITRUS

Variety	Season	Tree Size	Remarks
Calamondin	December - August	5-8' shrub	A spectacular ornamental, bearing hundreds of small, sour orange-like fruit. Very cold-hardy, nearly thornless, compact plant. Fruit is very popular in the Philippines.
Calamondin - Variegated	Everbearing	6' shrub	A highly ornamental plant, similar to Calamondin. However, both fruit and foliage have yellow variegation.
Citron - Fingered	Semi-Everbearing	4-6' shrub	a.k.a. Buddha's Hand Citron. A very aromatic fruit with finger-like sections. The rind can be candied.
Grapefruit - Cocktail Hybrid	January - June	6-8' shrub	A grapefruit and sweet orange cross. Pale orange flesh is exceptionally sweet and juicy. Fruit contains many seeds. Spreading shrub.
Grapefruit - Oro Blanco	December - May	6-8' shrub 15'+ tree	A delicious, sweet, seedless fruit. Excellent for fresh eating or juice. A very vigorous, spreading plant.
Grapefruit - Rio Red	March - September	6-8' shrub 15x10' tree	A favorite red-fleshed commercial grapefruit. Thick skinned, seedless fruit with flesh that ripens red in areas with high summer heat. An attractive, vigorous grower.
Grapefruit - Star Ruby	February - September	6-8' shrub	An excellent choice for coastal areas. Seedless fruit ripens with red flesh, both along the coast and inland.
Kumquat - Melwa	November - February	4-6' shrub 8' tree	Sweetest of commercial kumquat varieties. Best variety for fresh fruit use. Round orange colored fruit has a sweet rind. Hardy tree is highly ornamental. Excellent for containers.
Kumquat - Nagami	November - March	4-6' shrub 8' tree	Heavy producer of small, oval, bright orange fruit. Excellent for fresh eating or marmalade. Very compact and ornamental.
Lemon - Eureka	Everbearing	6-8' shrub 15x10' tree	The #1 commercial lemon variety. An excellent true lemon with medium-thick skin and few to no seeds. Vigorous upright tree is nearly thornless.
Lemon - Meyer (Improved)	Semi-Everbearing	4-6' shrub 8x5' tree	High quality juicy fruit is less acidic and sweeter than Eureka. Highly productive compact growing tree that is cold hardy. Excellent choice for small backyards or container growing.
Lemon - Pink Lemonade	Semi-Everbearing	4-6' shrub	Unique variegated Eureka-type fruit. Flesh is pale pink when fully ripe. Foliage is variegated ivory and green. An attractive upright growing tree.
Lemon - Pomona Sweet	Semi-Everbearing	6-8' shrub	A true sweet lemon that is excellent for juice and cooking. Vigorous upright tree with few seeds in the fruit. Beautiful flowers are blushed pink.
Lime - Bearss	Everbearing	6-8' shrub	a.k.a. Tahitian or Persian Lime. Excellent seedless commercial variety with juicy, acidic flesh. True lime flavor on a hardy, vigorous, upright plant.
Lime - Mexican	Semi-Everbearing	5-7' shrub 12x8' tree	a.k.a. Key or Bartender's Lime. Yellow-green, thin-skinned fruit is juicy and aromatic with few seeds. Attractive shrubby grower with many small thorns.
Lime - Thornless Mexican	Semi-Everbearing	5-7' shrub 12x8' tree	A thornless version of the Mexican Lime. Tree has a more upright growing habit and larger leaves than the Mexican Lime.
Lime - Kaffir	October - March	5-7' shrub	a.k.a. Citrus hystrix. Small, orange, bumpy, seedy, thick-skinned, very acidic fruit. Unique double-lobed leaf is used in Middle-Eastern and Asian cooking. Flowers can be used in tea. Compact globe shrub.
Lime - Sweet	Everbearing	5-7' shrub	a.k.a. Palestine or Indian Sweet Lime. Medium sized round fruit often with a nipple on the blossom end. Fruit is orange-yellow when fully mature.

<b>Mandarin/Tangerine - Algerian (Clemintine)</b>	December - April	6-8' shrub 13x9' tree	An excellent early tangerine. Attractive, reddish-orange, thin-skinned fruit is sweet, juicy and aromatic. Fruit holds well on the plant. Compact globe plant.
<b>Mandarin/Tangerine - Dancy</b>	December - April	6-8' shrub 13x9' tree	A leading commercial tangerine variety. Reddish-orange, thin-skinned, flavorful fruit is easy to peel. Productive, attractive, upright shrub.
<b>Mandarin/Tangerine - Honey</b>	January - April	6-8' shrub	An excellent mandarin. Extremely sweet, flavorful, thin-skinned fruit is easy to peel. Productive, attractive, upright shrub.
<b>Mandarin/Tangerine - Pixie</b>	March - July	6-8' shrub	A great choice for a late-season tangerine. Seedless, thin-skinned, mild, sweet fruit is easy to peel. Excellent vigorously upright growing variety.
<b>Navel Orange - Cara Cara</b>	January - March	6-8' shrub	A unique thick-skinned navel orange with seedless fruit. It has deep pink, extremely flavorful, sweet and juicy flesh. A great addition to any backyard.
<b>Navel Orange - Washington</b>	December - May	6-8' shrub 10x8' tree	The #1 commercial navel orange variety. Thick-skinned, large, seedless fruit has sweet and juicy flesh. Excellent for fresh eating.
<b>Orange - Valencia</b>	March - October	6-8' shrub 15x10' tree	The best orange for juice. Thin-skinned, medium-large, sweet fruit has a high juice content. Fruit holds well on tree and tolerates the intense desert heat.
<b>Blood Orange - Moro</b>	January - April	6-8' shrub 13x9' tree	The #1 commercial blood orange. Thick-skinned, medium-large fruit has juicy, rich-flavored, burgundy-red flesh. An excellent choice for all citrus climates.
<b>Blood Orange - Sanguinelli</b>	January - May	6-8' shrub	The best-tasting blood orange. Oblong, medium-thick skinned fruit has strawberry red flesh. Highly productive, medium-sized plant has few thorns.
<b>Blood Orange - Tarocco</b>	January - May	6-8' shrub	The largest blood orange. The rich, reddish-orange flesh has a high juice content with berry overtones and few seeds.
<b>Pummelo - Chandler</b>	January - May	6-8' shrub	Very sweet flavored, pink-fleshed fruit is larger than a grapefruit with a very thick rind. Vigorous, spreading shrub is highly productive.
<b>Tangelo - Minneola</b>	February - May	6-8' shrub 15x10' tree	A delicious mandarin and grapefruit hybrid. The unique, medium-thick skinned fruit has rich, aromatic, flavorful and extremely juicy flesh. Very colorful reddish-orange fruit has a distinct neck.

## SUBTROPICAL FRUITS

Variety	Harvest	Hardy to	Tree Size	Remarks
<b>Fig - Black Jack</b>	June - September	10°F	Large tree	Fruit has delicious, medium-sized, sweet fruit with dark purple skin and red flesh. Compact variety is excellent for use in containers or as an espalier.
<b>Fig - Black Mission</b>	June - frost	10°F	Large tree	The taste standard for figs. Fruit has dark purple skin with red flesh. First planted in California in 1769 by Fr. Junipero Serra.
<b>Fig - Brown Turkey</b>	June - frost	10°F	Large tree	Large brown skinned, elongated fruit with pink flesh and is juicy and firm with a rich flavor. Fruit is excellent fresh, dried or canned. Compact grower is suitable for small yards and tree can bear twice a year.
<b>Fig - Kadota</b>	June - frost	10°F	Medium tree	A leading commercial variety. Delicious fruit is excellent canned, dried or eaten fresh. Performs especially well in hot interior valleys. Yellow/green skin with amber flesh.
<b>Fig - Panache</b>	July - October	10°F	Large tree	A unique fig with striped yellow and green skin fruit and strawberry flesh that is dry, but sweet. Fruit ripens best in hot climates.
<b>Fig - White Genoa</b>	June - frost	10°F	Large tree	Large fruit is delicious fresh or dried. Vigorous, open tree performs well on the coast. Yellow/green skin with cream flesh. Great for home orchard.
<b>Grape - Chardonnay</b>	September	0°F	Vine	An excellent choice for white burgundy vines. Pale green berries are best grown in cool-summer climates.
<b>Grape - Flame Seedless</b>	July - August	0°F	Vine	Highly productive, crisp, sweet, light red, seedless grapes borne on loose clusters. Fine flavor. Excellent for table and raisin use.
<b>Grape - Merlot</b>	September	0°F	Vine	Black berry used for red wines. Best quality in cooler summer climates.
<b>Grape - Thompson Seedless</b>	August - September	0°F	Vine	Famous white seedless table grape. Small to medium-sized, pale green, thin-skinned fruit with crisp, juicy flesh.
<b>Grape - Zinfandel</b>	August - September	0°F	Vine	For fruity red wines. Heavy bearer of juicy, round, reddish-black berries. Performs best in milder climates.
<b>Kiwi - Male &amp; Female combination</b>	August - October	0°F	Vine	Handsome large fuzzy leaves on a climbing vine. Female vine bears medium-sized egg-shaped fruit. Plant near male vine to ensure pollination. Low chilling required for fruit production. Support vines on a trellis or frame to keep fruit off of ground. 100 chill hours.
<b>Loquat - Gold Nugget</b>	April - May	12°F	Large Leaf Globe	Well known, late-season variety. Medium-sized, light orange fruit has sweet, juicy, yellow flesh. Performs well.
<b>Pineapple Guava - Coolidgei</b>	October - December	12°F	Shrub or Patio tree	Delicious, pineapple flavored fruit grows to 6oz. Green rind with tasty yellow flesh. Showy pink flowers have edible petals. Attractive plant has silver-blue foliage. Self-fertile.
<b>Pineapple Guava - Nazemetz</b>	October - December	12°F	Shrub or Patio tree	Same flowers and foliage as the Coolidgei variety with somewhat larger fruit. Performs best in coastal areas. Self-fertile.
